Company presentation

Infineon Technologies AG

August 2024

Driving decarbonization and digitalization. Together.

Semiconductors are crucial to solve the energy challenges of our time and shape the digital transformation.

This is why Infineon is committed to actively driving decarbonization and digitalization.

As a global semiconductor leader in power systems and IoT, we enable game-changing solutions for green and efficient energy, clean and safe mobility, as well as smart and secure IoT.

We make life easier, safer, and greener.
Together with our customers and partners.
For a better tomorrow.

Infineon is a global leader in power systems and IoT

Global leader

in automotive, power management,
energy efficient technologies and IoT

~58,600

employees[1]

Market position

Automotive	Power	Microcontroller
#1	**#1**	**#2**
TechInsights, April 2024	Omdia, September 2023	Omdia, May 2024

[1] As of 30 September 2023

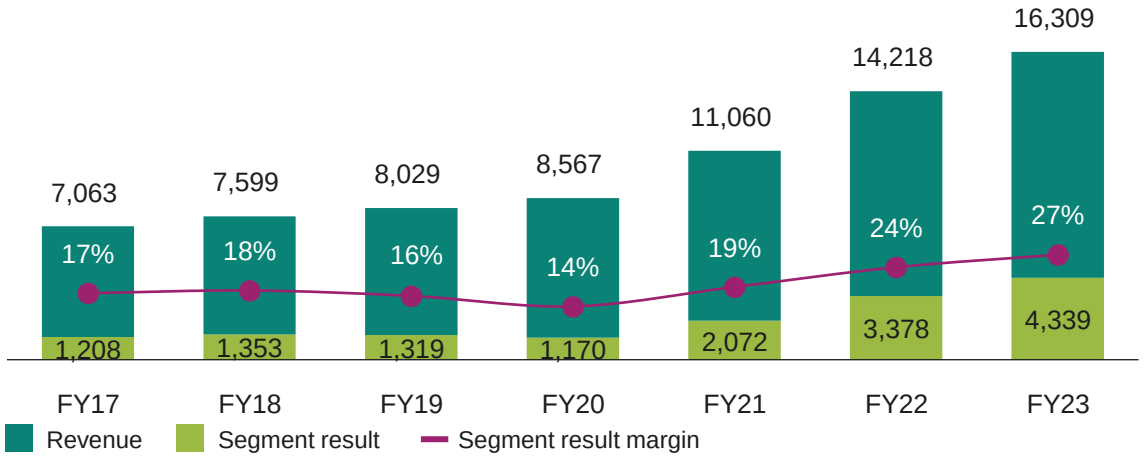
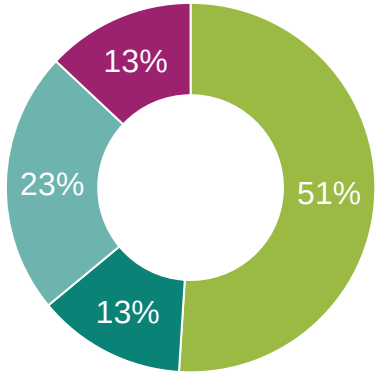
Financials

[EUR m]



FY23 revenue by segment[1]

- Automotive (ATV)
- Green Industrial Power (GIP)
- Power & Sensor Systems (PSS)
- Connected Secure Systems (CSS)

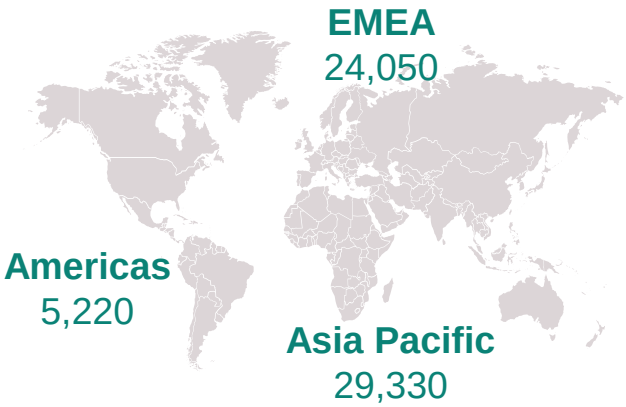


Employees[1]

58,600
employees worldwide

69
R&D and

15
manufacturing locations[2]



For further information: Infineon Annual Report.
1 2023 Fiscal year (as of 30 September 2023) | **2** As of 1 August 2024

Infineon leading in power systems – mastering all three key materials

- Reliable multi sourcing of raw materials
- World-scale fabs

Controller → **Driver IC** → **Power switch** (Si/SiC/GaN)

Software + Algorithms

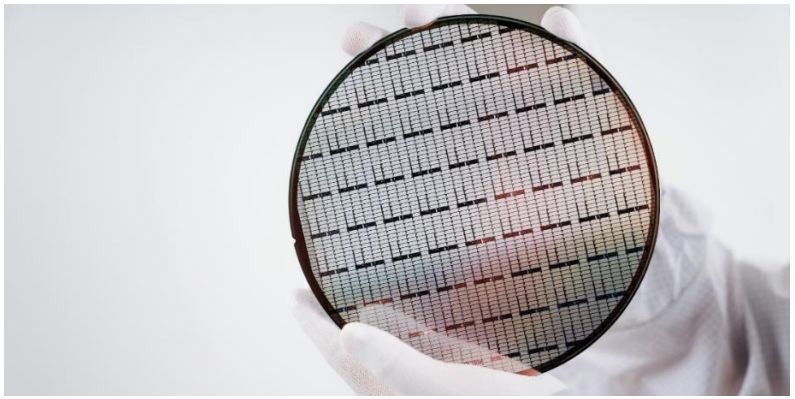
- Application understanding
- Packaging know-how and hybridization competence

Leadership in Power Systems across all materials and technologies

Silicon
Diode – MOSFET – IGBT – Driver – Controller

Silicon carbide
Diode – MOSFET

Gallium nitride
HEMT – Driver



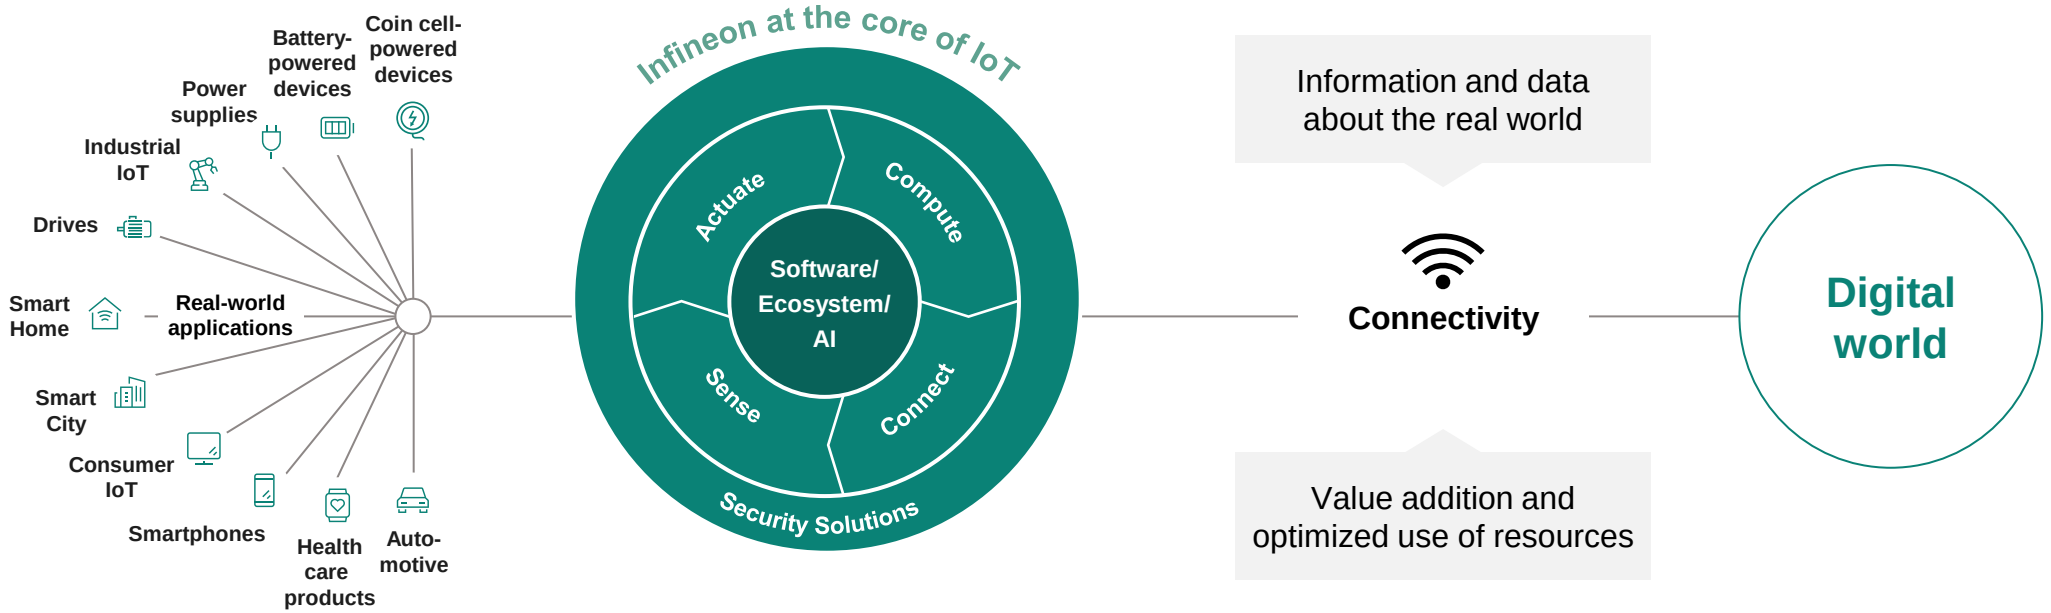
Infineon leader in IoT – driving digitalization by serving strongly growing multi-application markets

Consumer IoT

Industrial IoT

Automotive IoT

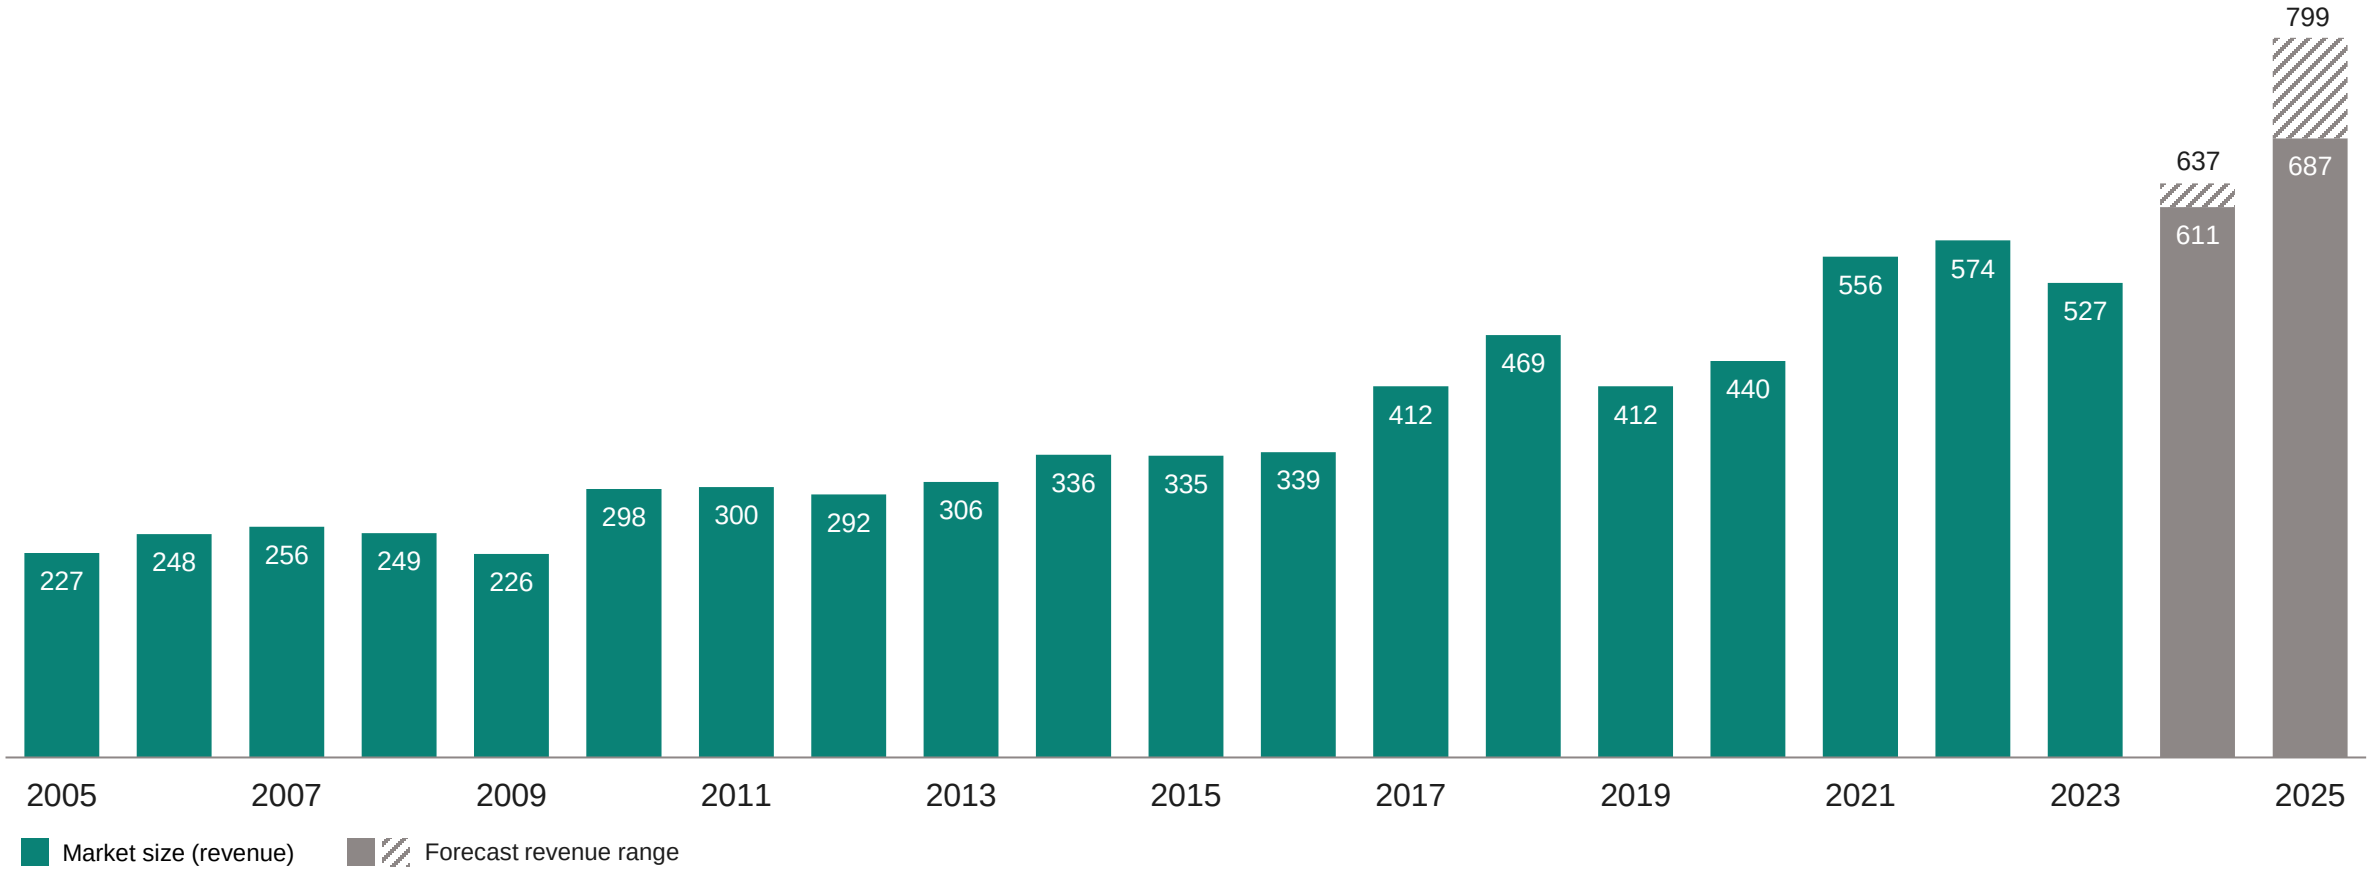
Products: MCU – Connectivity (Wi-Fi, BLE, NFC) – Sensors – Security – Power supply & switches



Semiconductor market forecasts predict growth for 2024 & 2025

Global Semiconductor Market

Market size in billion US-Dollar

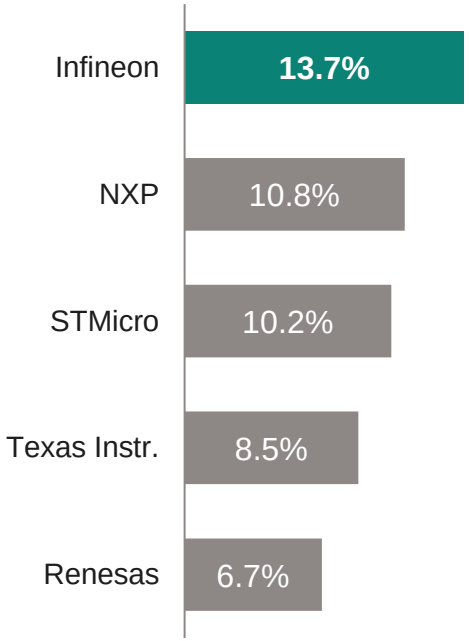


Source: WSTS for historical data.| **Forecast:** of WSTS, Omdia, Gartner, TechInsights; last update 25 July 2024.

Infineon is clear #1 in Automotive and power semiconductors, and ranked #2 in the overall microcontroller market

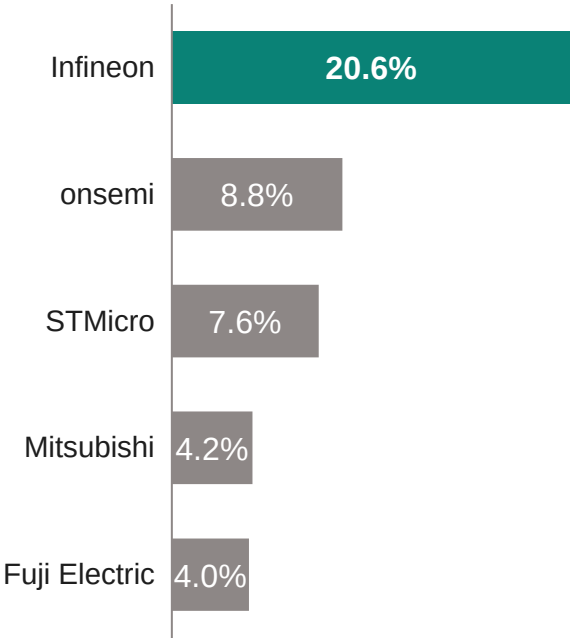
Automotive semiconductors

2023 total global market: USD 69.2bn[1]



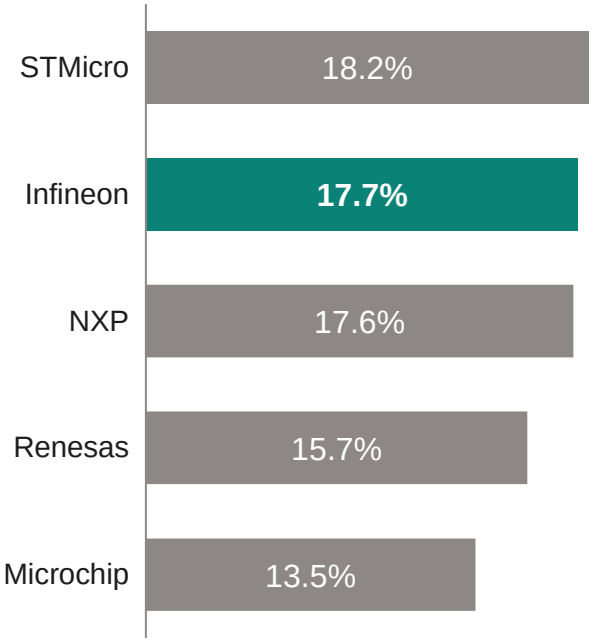
Power discretes and modules

2022 total global market: USD 30.9bn[2]



Microcontroller suppliers

2023 total global market: USD 28.1bn[3]

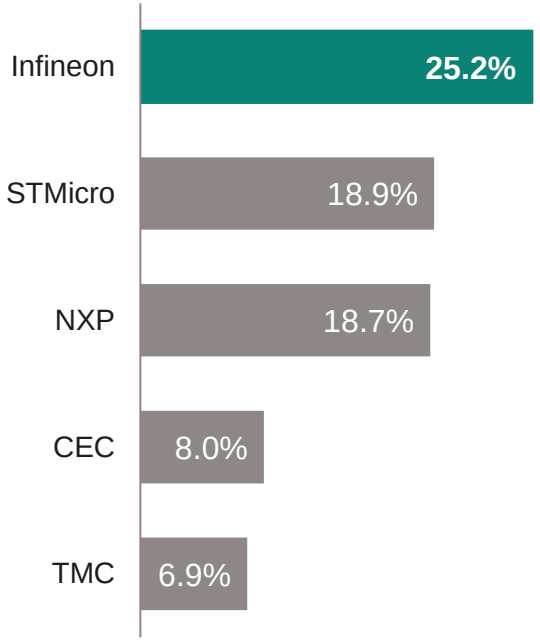


1 TechInsights: Automotive Semiconductor Vendor 2023 Market Shares. April 2024. | **2** Based on or includes research from Omdia: Power Semiconductor Market Share Database – 2022. September 2023. | **3** Based on or includes research from Omdia: Annual 2001-2023 Semiconductor Market Share Competitive Landscaping Tool – 1Q24. May 2024. Results are not an endorsement of Infineon Technologies AG. Any reliance on these results is at the third party's own risk.

Infineon is clear leader in security ICs and MEMS microphones, and ranked #2 in the NOR Flash market

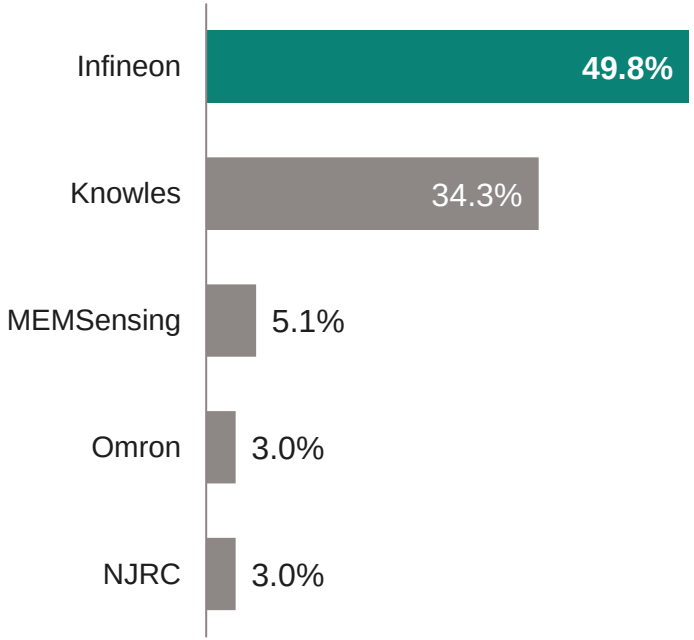
Security ICs

2022 total global market: USD 3.6bn[1]



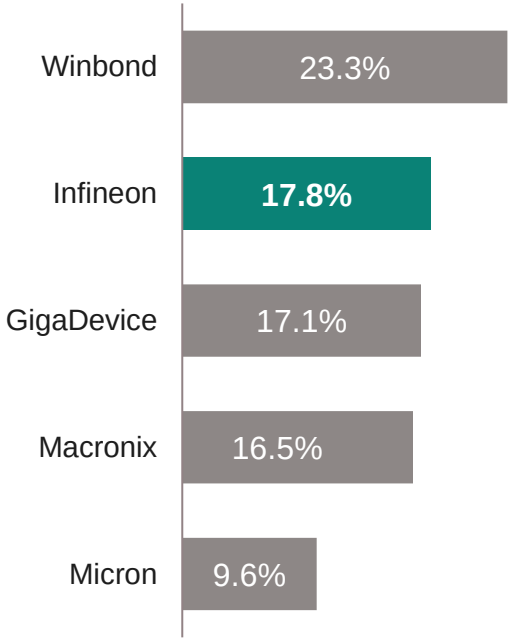
MEMS microphones

2022 total global market: 7.3bn units[2]



NOR Flash

2023 total global market: USD 2.8bn[3]



1 ABI Research: Secure Smart Card and Embedded Security IC Technologies. October 2023. | Excluding NFC controllers and embedded secure elements. | **2** Based on or includes research from Omdia: MEMS Microphone Report – 2023 Database. September 2023. | MEMS Microphone Die Suppliers. | **3** Based on or includes research from Omdia: Annual 2001-2023 Semiconductor Market Share Competitive Landscaping Tool – 1Q24. May 2024. Results are not an endorsement of Infineon Technologies AG. Any reliance on these results is at the third party's own risk.

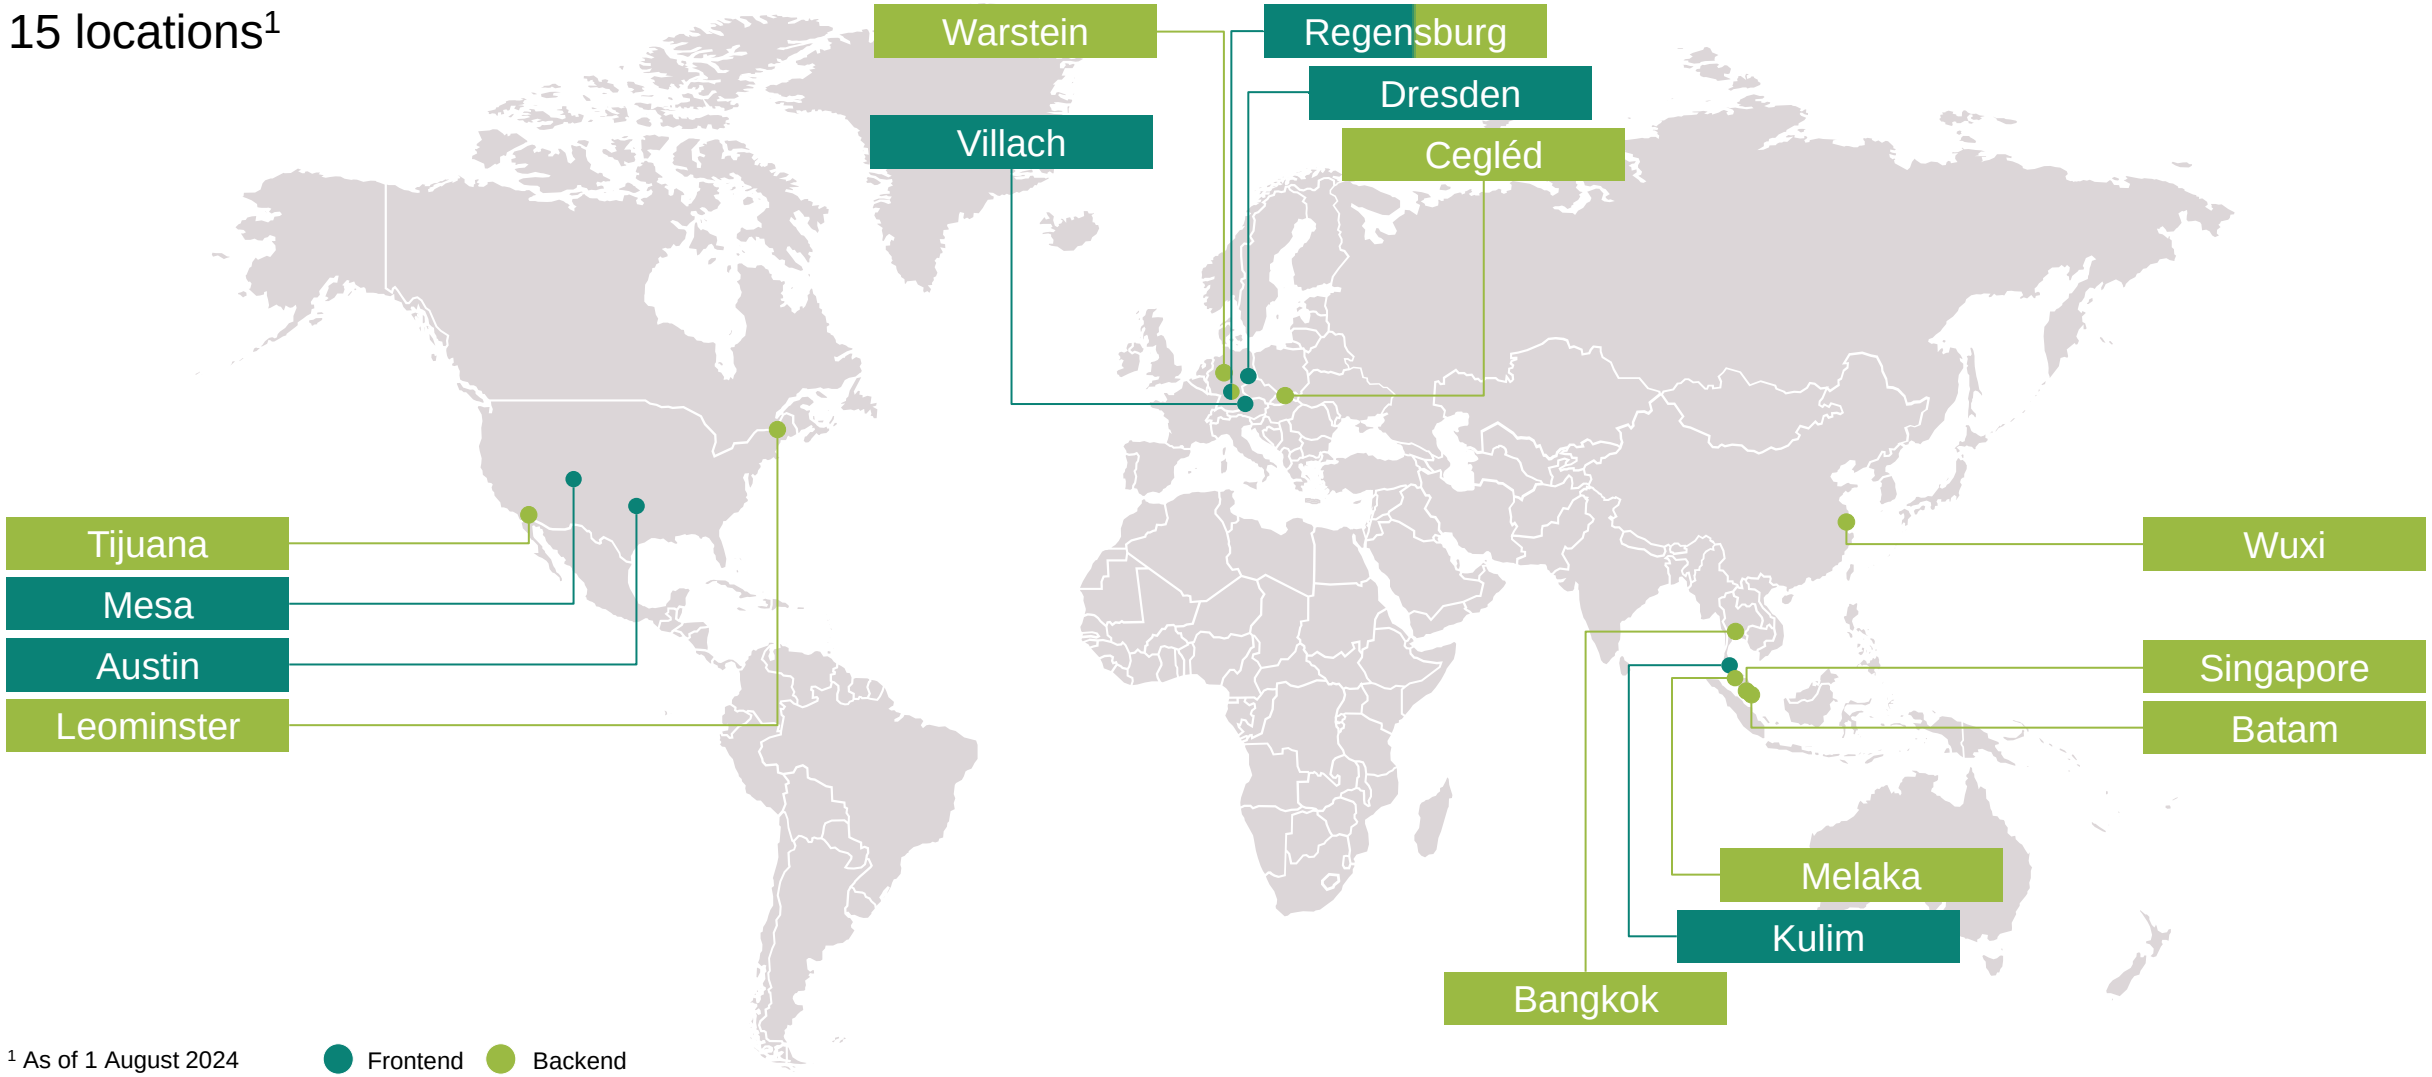
Infineon is globally positioned with its network of Frontend and Backend manufacturing facilities

15 locations[1]



[1] As of 1 August 2024

Frontend Backend

Our global Research and Development activities

About 12 percent

of Infineon's annual revenue goes into Research and Development (R&D). In fiscal year 2023, R&D investments amounted to about 2 billion euros.

29,700 patents and patent applications in the overall portfolio

show a high level of innovative strength and longterm competitiveness. In fiscal year 2023 alone, Infineon registered about 1,850 new patent applications.

Numerous innovative ecosystems

with tech companies, universities and research institutes are of great importance to Infineon.

69[1] sites in 25 countries and regions:

Americas	Guadalajara, Tijuana (Mexico); Andover, Austin, Chandler, Colorado Springs, El Segundo, Irvine, Leominster, Lexington, Lynnwood, Morrisville, Murrieta, Portland, San Diego, San José and Warwick (all USA)
Asia Pacific	Bangalore (India); Batam (Indonesia); Cheonan and Seoul (both Korea); Ipoh, Kulim, Melaka and Penang (all Malaysia); Muntinlupa (Philippines); Singapore (Singapore); Nonthaburi (Thailand)
Greater China	Chengdu, Shanghai, Shenzen, Wuxi and Xi'an (all Mainland China); Hsinchu and Taipei (both Taiwan)
Japan	Nagoya, Sendai, Tokyo (all Japan)
Europe	Graz, Klagenfurt, Linz and Villach (all Austria); Herlev (Denmark); Le Puy-Sainte-Réparade (France); Augsburg, Dresden, Duisburg, Erlangen, Ilmenau, Langen, Neubiberg, Regensburg, Soest and Warstein (all Germany); Budapest and Cegléd (both Hungary); Cork and Dublin (both Ireland); Netanya (Israel); Padua and Pavia (both Italy); Nijmengen (Netherlands); Brasov, Bucharest and Iasi (all Romania); Belgrad (Serbia); Bristol and Redhill (both UK); Lviv (Ukraine)

[1] as of 30 September 2023.

Infineon is committed to binding CO_2 reduction targets

1 Carbon neutrality[1] by 2030 – primarily by avoiding direct emissions and increasing energy efficiency

2 Expansion of climate strategy to the supply chain by committing to set a Science-Based Target to include Scope 3

3 Infineon’s products and solutions enable a net-zero economy and link the real and the digital world

[1] Scope 1 and 2

Corporate Social Responsibility: We create a net ecological benefit

In various areas of application (automotive electronics, industrial drives, photovoltaics as well as wind energy), our products can achieve CO_2 savings during their lifetime of around 117 million tons of CO_2 equivalents. Compared with the European electricity mix, this is around 12.5 percent of the annual net electricity production of the European Union.

CO_2 burden[1]

of 3.4 million tons
CO_2 equivalents

Ratio around 1:34

CO_2 savings[2]

of 116.6 million tons
CO_2 equivalents

Net ecological benefit: CO_2 emissions reduction of more than 113 million tons

1 This figure takes into account manufacturing, transportation, own vehicles, travel, supplier-specific emissions, water/waste water, direct emissions, energy consumption, waste etc. as well as direct and indirect energy-related emissions by manufacturing service providers. It is based on data collected internally and publicly available conversion factors and relates to the 2023 fiscal year.
2 This figure is based on internally established criteria, which are described in the explanatory notes. The figure relates to the 2022 calendar year and takes into account the following application areas: automotive electronics, industrial drives, photovoltaics as well as wind energy. CO_2 savings are calculated based on the potential savings generated by technologies in which semiconductors are used. The CO_2 savings are allocated based on Infineon's market share, semiconductor share and the lifetime of the technologies concerned, based on internal and external experts' estimations. Despite the fact that carbon footprint calculations are subject to imprecision due to the complex issues involved, the results are nevertheless clear.

Infineon’s Global Environmental Sustainability Strategy focuses on four areas of action

Sustainability at our sites

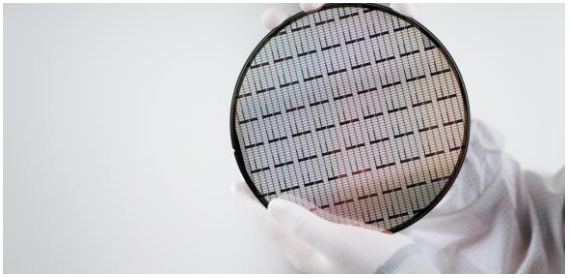
Our production facilities, buildings, and plants have a minimal footprint

In our supply chain

Infineon acts in an environmentally conscious and socially responsible manner across its supply chain

As part of our culture

Our employees make a voluntary contribution to creating a sustainable world



With our products

Our products are built into many different applications that make a significant contribution to decarbonization

"As Chief Digital and Sustainability Officer of Infineon Technologies, I will use my mandate to drive both - our digital and green transformation - together with our colleagues, customers, and partners around the world. This also means realizing new and disruptive ideas."

Elke Reichart
Chief Digital and Sustainability Officer

Infineon promotes respect for human rights, the environment and safe working conditions

Together for human rights

Our commitment to internationally recognized human rights principles and standards, namely International Bill of Human Rights and its Universal Declaration on Human Rights is reflected in our:

- **CSR Policy**
- **Human Rights Policy**
- **Business Conduct Guidelines**
- **Supplier Code of Conduct**

Any suspicion of human rights violations or concerns can be raised by any stakeholder to either our Human Rights Officer, Compliance or through our whistleblower hotline Infineon Integrity Line.

Integrated Management Program for Environment, Energy, Safety & Health (IMPRES)

IMPRES is an internally developed management system which aims to fulfill the legal requirements and ensure:

- Efficient resources management
- High safety and health standards
- Environmental protection
- Efficient energy management

It is structured and certified in accordance with:

ISO 14001[1] **ISO 45001[1]** **ISO 50001[2]**

1 Since 2005 Infineon has a worldwide certification at all major manufacturing sites and corporate headquarters. | **2** Since 2012 Infineon is certified at the largest European manufacturing sites and corporate headquarters.

Table of contents

Infineon's employees create a better future together

At Infineon, 58,600[1] people from over 100 countries work together around the world to make life easier, safer, and greener. For more information, please visit www.infineon.com/career

Preethi Baran

Senior Director, Field Sales,
in Livonia

"It's motivating to work with our customers to transform our mobility through innovation, safety and security."

Thomas Wrzesinsky

Maintenance Technician,
in Dresden

"We maintenance technicians keep production moving. I appreciate the teamwork: when everyone pulls together to find the error and to get the equipment running again."

Marcel Kuba

Director, Field Application Engineering,
in Munich

"The acquisition of Cypress enables Infineon now to offer complete best in class system solutions for new auto-motive applications."

Dr. Pamela Lin

Senior Manager Data Scientist Analytics, in Wuxi

"It's amazing how we use advance data analytics and AI techniques to create intelligent systems for solving complex business problems and driving manufacturing efficiency."

[1] As of 30 September 2023.

Our competitive advantage: Differentiating as quality leader

Our path

We do what we promise.
That's quality made by Infineon.

Our aspiration

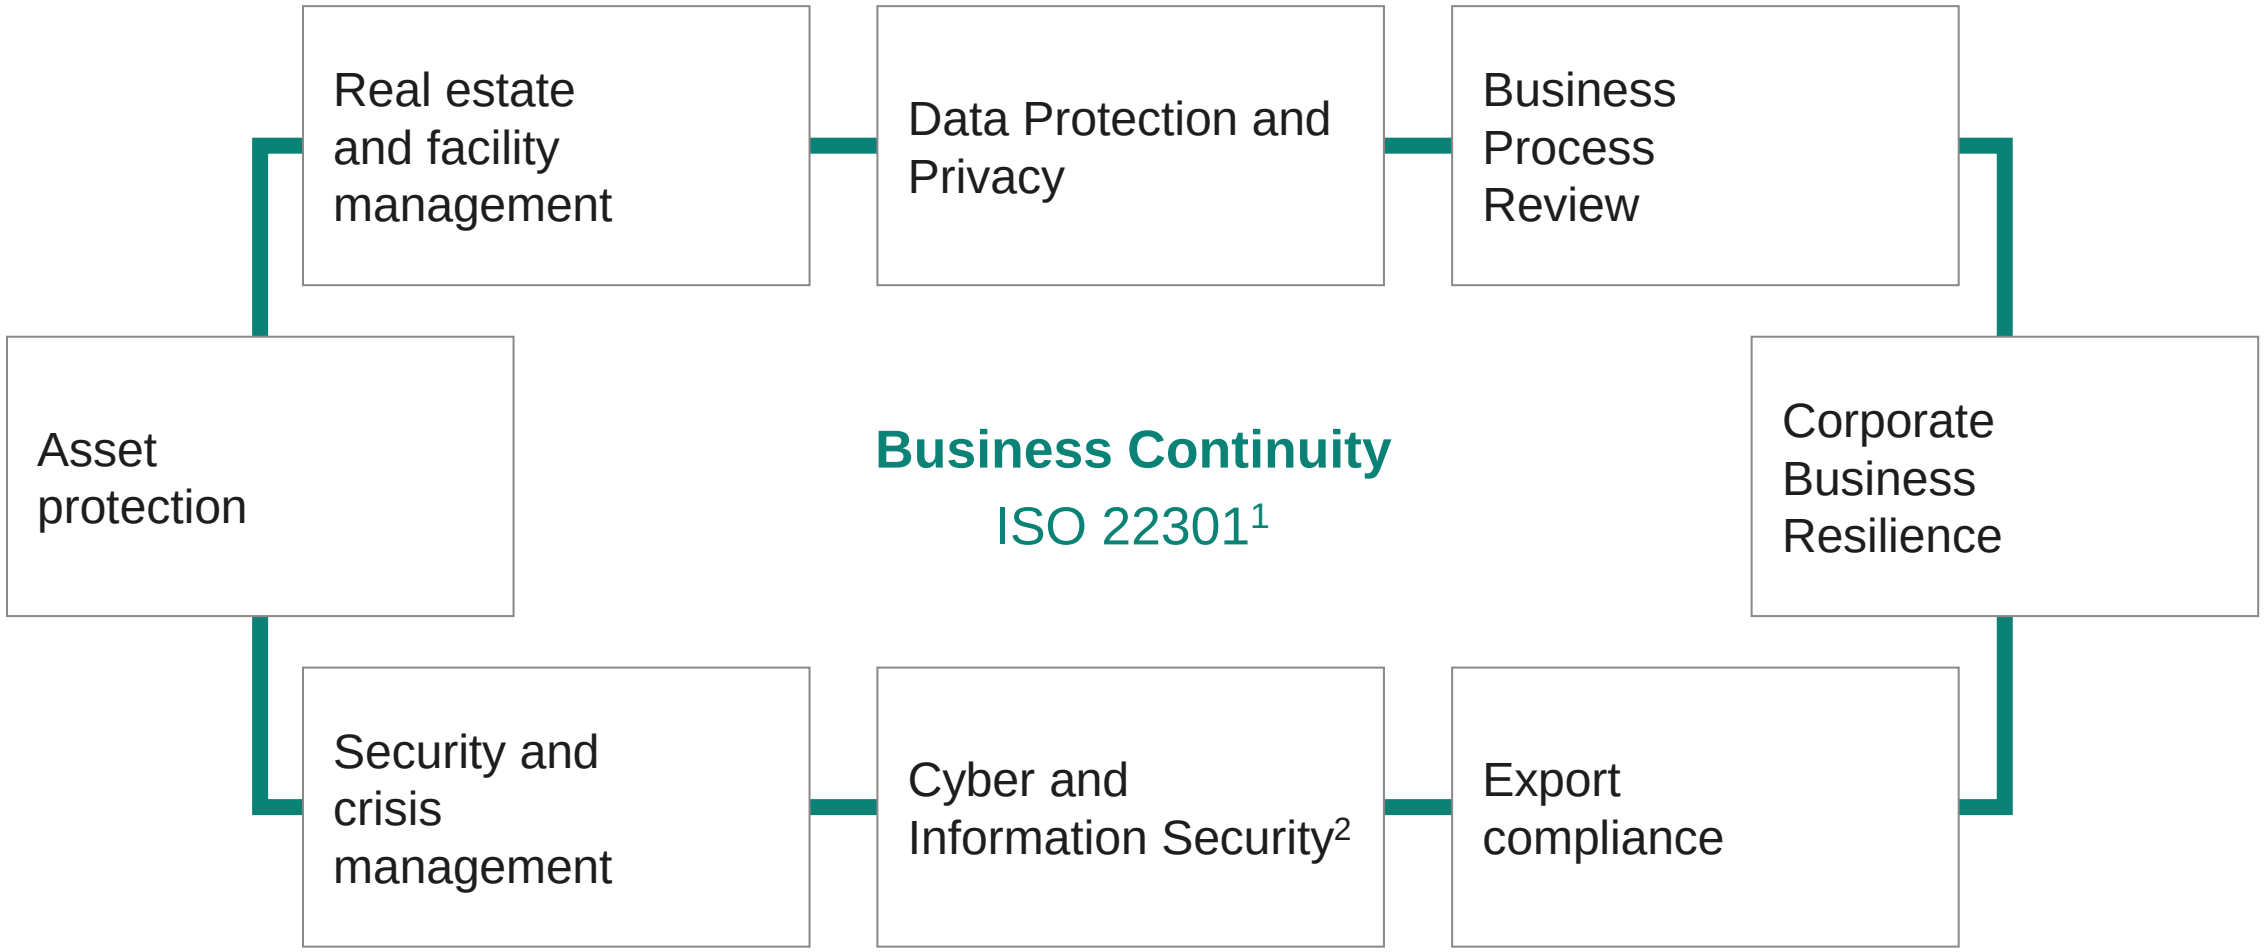
Zero defect regarding the committed

- Functionality
- Reliability
- Time
- Volume and cost

Our foundation

International standards such as
ISO 9001, IATF 16949, AS 9100,
IEC 17025, ISO 26262

Business Continuity: Integrated management



1 ISO 22301 certified in Villach (Austria), Dresden (Germany) and Regensburg (Germany). | **2** Different certifications (e.g. TISAX).
